        Scanner sc=new Scanner(System.in);
        System.out.print("Nhap n :");
        int n=sc.nextInt();
        int tong=0;
        for (int i=0;i<n;i++){
            tong+=i;
            i++;
        }
        System.out.println("Tong tu 1 den n la :"+tong);
        sc.close();
    }
}

The screenshot shows an IDE with three tabs: Mavenproject1.java, Mavenproject2.java, and Mavenproject3.java. The active tab is Mavenproject3.java, which contains the following Java code:

```
1 package com.mycompany.mavenproject3;
2 import java.util.Scanner;
3 public class Mavenproject3 {
4     public static void main(String[] args){
5         Scanner sc = new Scanner(System.in);
6         System.out.print("Nhap n :");
7         int n = sc.nextInt();
8         for (int i=1;i<=10;i++){
9             System.out.println(n+"x"+i+"="+ (n*i));
10        }
11        sc.close();
12    }
13 }
```

Below the code editor, the package path is shown as `com.mycompany.mavenproject3.Mavenproject3`. The output window, titled "Output - Run (mavenproject3)", displays the following text:

```
